## Education —

### **Front-End Developer + UX Designer**

University Health Network • April 2019 - Aug 2019

Built custom front-end framework using  
Bootstrap, HTML/CSS, and JavaScript to redesign  
websites for research facilities

Collected user-research, created user-flows and  
wireframes, resulting in a new and improved  
brand guideline and strategy

### **Teaching Assistant - Design + Dev Course**

University of Waterloo • Jan 2019 - Dec 2019

Provided my experience in front-end  
development and UX through teaching a second  
year web design course

Shared my extensive knowledge of HTML/CSS,  
layout, typography, colour theory, and  
accessibility for both web and app design

Facilitated one-on-one guidance, providing  
assignment feedback, and assistance with labs,  
resulting in a higher class average

## Projects —

### **Attendance Tracker Web App**

As a UX designer + front-end developer on a  
team, I created a web-based attendance app  
using Bootstrap CSS Framework, HTML, Node.js +  
Express. Teachers can take and track attendance  
across numerous classes

### **Futureland**

Designing visual + digital art for 365+ days.  
Completed projects in various disciplines (UI,  
Animation, Sketching)
