Work —

Front-End Developer + UX Designer

University Health Network • April 2019 - Aug 2019

Built custom front-end framework using
Bootstrap, HTML/CSS, and JavaScript to redesign
websites for research facilities

Collected user-research, created user-flows and
wireframes, resulting in a new and improved
brand guideline and strategy

Teaching Assistant - Design + Dev Course

University of Waterloo • Jan 2019 - Dec 2019

Provided my experience in front-end
development and UX through teaching a second
year web design course

Shared my extensive knowledge of HTML/CSS,
layout, typography, colour theory, and
accessibility for both web and app design

Facilitated one-on-one guidance, providing
assignment feedback, and assistance with labs,
resulting in a higher class average

Projects —

Attendance Tracker Web App

As a UX designer + front-end developer on a
team, I created a web-based attendance app
using Bootstrap CSS Framework, HTML, Node.js +
Express. Teachers can take and track attendance
across numerous classes

Futureland

Designing visual + digital art for 365+ days.
Completed projects in various disciplines (UI,
Animation, Sketching)
