Github • /taniasharma98

## Work —

### **Front-End Developer + UX Designer**

University Health Network • Apr 2019 - Aug 2019

Built custom front-end framework using Bootstrap, HTML/CSS, and JavaScript to redesign websites for research facilities

Collected user-research, created user-flows and wireframes, resulting in a new and improved brand guideline and strategy

### **Teaching Assistant - Design + Dev Course**

University of Waterloo • Jan 2019 - Dec 2019

Provided my experience in front-end development and UX through teaching a second year web design course

Shared my extensive knowledge of HTML/CSS, layout, typography, colour theory, and accessibility for both web and app design

Facilitated one-on-one guidance, providing assignment feedback, and assistance with labs, resulting in a higher class average

## Projects —

### **Attendance Tracker Web App**

As a UX designer + front-end developer on a team, I created a web-based attendance app using Bootstrap CSS Framework, HTML, Node.js + Express

### **Futureland**

Designing visual + digital art for 365+ days. Completed projects in various disciplines (UX, Animation, Sketching)
