#### Work -

# Front-End Developer + UX Designer

websites for research facilities

University Health Network • April 2019 - Aug 2019

Built custom front-end framework using

Bootstrap, HTML/CSS, and JavaScript to redesign

Collected user-research, created user-flows and wireframes, resulting in a new and improved brand guideline and strategy

# Teaching Assistant - Design + Dev Course

University of Waterloo • Jan 2019 - Dec 2019

Provided my experience in front-end development and UX through teaching a second year web design course

Shared my extensive knowledge of HTML/CSS, layout, typography, colour theory, and accessibility for both web and app design

Facilitated one-on-one guidance, providing assignment feedback, and assistance with labs, resulting in a higher class average

# Projects —

# Attendance Tracker Web App

As a UX designer + front-end developer on a team, I created a web-based attendance app using Bootstrap CSS Framework, HTML, Node.js + Express. Teachers can take and track attendance across numerous classes

#### **Futureland**

Designing visual + digital art for 365+ days. Completed projects in various disciplines (UI, Animation, Sketching)
